Steel & O'Brien Fulfillment Center in California

Steel & O'Brien Manufacturing has acquired the U.S. assets of New Zealand-based Ultibend Industries. Through the transaction, Steel & O'Brien assumes the U.S. fulfillment center of Ultibend, based in Torrance, California.

Ultibend Industries, a manufacturer and provider of stainless-steel sanitary fittings, is exiting the U.S. market to realign the company's focus on its core markets in New Zealand and Australia. Ultibend, through the sale, is partnering with Steel & O'Brien to provide uninterrupted and expanded service to its customers in the U.S.

Jesse Martinez from Ultibend USA has joined Steel & O'Brien as an Inside Sales Representative and will work alongside the Steel & O'Brien team to continue servicing Ultibend customers. Jesse will be based in Southern California.

We are excited to provide Ultibend's customers the full breadth of our offering for sanitary and BPE fittings, tubing, valves, and pumps, along with our custom machining and fabrication capabilities.

Here are direct links to all of the products now available from the Torrance, CA location:
